

**FUNCTIONS**

- Opening or closing the far end of tested pair when just one person wants to perform a measurement during which the far endings should be opened or closed (e.g K pfm ller method).
- Current measurement at the far end of the tested pair when Graaf method is applied. In case of Graaf method the master instrument and the remote controllable intelligent slave (ECFL 30S) measure the current at the two cable ends at the same time and communicate over the tested pair. The Master calculates the location of fault out of the rate of currents
